

Instruction for installation

1. Power off

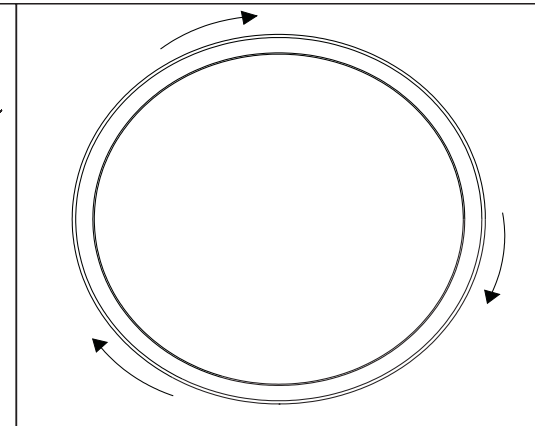

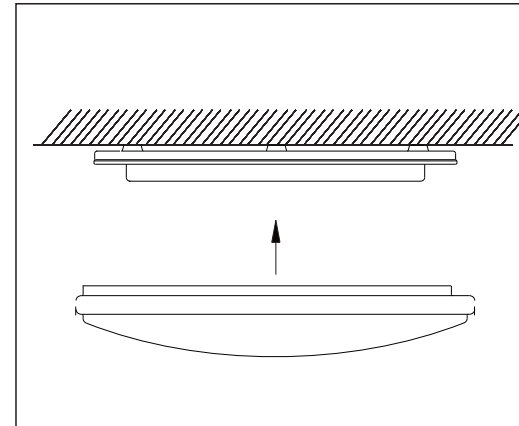

2. Open the pack and take out lamp. Check the side of lamp, you will find a small screw. Then take off the screw by screwdriver.

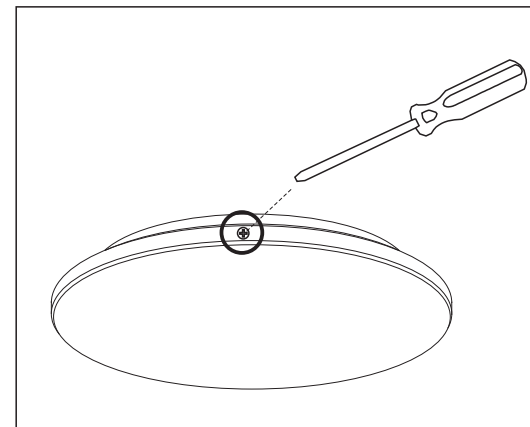

3. Rotate the cover, then you can take off the cover, take out the chassis. Determine the hole at the desired position on the ceiling, then drill the reserved hole by electric drill, and put the expansion glue nail in it. Install the chassis by screws.

4. Power wire connect by small screwdriver.
("L" is the "live line";
"N" is the "zero line";
"E" is the "earth line")

5. Install the lamp cover into chassis.

6. Install the small screw by screwdriver, which is in the side of lamp.
